

Marco Bona

Head of International Programs

Marco Bona is a manager of the Group Purchasing department in Finmeccanica Group Services and he is currently assigned as the Head of International Programs; he is in charge of providing end-to-end sourcing services on the global market scale: his duties include the responsibility of the China, India and US international procurement offices, the engagement in long standing partnerships with local industry and institutions, the set up of relationships with governmental agencies of targeted sourcing countries. Worthy of remark are the participation to the “Global Supply Chain program” promoted by the Australian DoD, and the “European Innovation Partnership on Raw Materials” by the European Commission. Moreover he is responsible for the indirect procurement optimization on UK market, supporting the Finmeccanica UK based companies. Within Finmeccanica Group Services he has been also Head of PMO developing methodologies and tool of project portfolio management to perform recurrent executive reporting.

He also served as Business Consultant at Accenture, from November 2001 – March 2006; in this role he was team leader for business process reengineering and system integration projects to drive the major national and European Utilities through the energy and natural gas market liberalization.

Prior to that he was Project Engineer at Ericsson Microwave Systems AB in Gothenburg, Sweden, where he developed his master’s degree thesis as part of a wider team aimed at the design and manufacturing of improved capacity mobile communication networks.

Mr. Bona earned his M.S. at Politecnico di Torino University in Telecommunication Engineering in 2001. He has studied Electrical Engineering at the Royal Institute of Technology in Stockholm, Sweden, where he completed his M.S. as part of a double degree exchange program from August 1998 – May 2000. He speaks English, Swedish and French at varying degrees and published one technical review on microwave and antennas for mobile communications. He is a PMI’s Project Management Professional (PMP) certified since 2008 ; he is licensed to practice as professional Engineer in Italy.
